

SALES ORDER PROCESSING

Infor VISUAL Jobshop Premier Edition streamlines workflow and eliminates the need for redundant data entry by integrating quoting, order entry, inventory control, production, shipping, and invoicing.

Develop accurate quotes, copy those quotes into orders, and instantly create shop orders, complete with work instructions for employees.

Automatically account for supplier price breaks when developing quotes for multiple quantities.

Ship, invoice, generate paperwork, relieve inventory, and track costs—all with a few clicks of the mouse.

Quickly and easily add lines to Quotes or Sales Orders by filtering and/or sorting the parts list and then select multiple rows and add them with a single mouse click.

Continuously improve your company's performance and review sales, profitability, and throughput with Infor VISUAL Jobshop Premier's extensive reporting capability.

Conduct, measure, and manage your business success with more than 100 reports. Customize Infor VISUAL Jobshop Premier's existing reports or write your own with any ODBC-compliant report writer, such as Microsoft Access or Crystal Reports.
